

Uncompromised Border Protection Is Where We Draw the Line

World Leading Provider of Comprehensive
Solutions and Technologies

45 years of border securing ■ installation-base across 80 countries ■ recognized turnkey provider

Securing and Protecting:

land borders

states' borders

nautical borders

Frontline technology for your frontline protection:

Wide Range of Technological Solutions for Physical and Virtual Perimeters

Lowest Nuisance Alarm Rate (NAR)

Terrain, weather and environment agnostic

Political and legal adherence

Low dependence on external resources

Robust and highly reliable equipment

Simple installation and integration with existing infrastructure

Borders are there to secure lives, facilities, property, and policy. They are your frontier of sovereignty, law and order. Where no two borders are the same, Magal-S³ offers an unrivaled set of capabilities to address all of your protection requirements.

Magal-S³ executes a comprehensive threat and risk assessment, offers a protection strategy in accordance with your goals and challenges, and deploys a cutting edge end-to-end solution:

Early Warning:

UAV, Radar, Long Range CCTV, Aerostat

Fence Intrusion Protection:

Mounted, virtual, buried sensors and detection means, PTZ cameras

Border Checkpoints:

face recognition, handheld scanning, vehicle examination, LPR, access control, barriers

Surveillance and Interception:

Local control center, decision-making tools, machine learning and more

Patrolling:

mobile terminals and handheld enriched communication

Accurate Location Resolution

Obtain precise location of any intruder with a combination of sensors and pinpointing camera technology

Simultaneous Intrusion Detection

Each sensor operates autonomously and analyzes separately, allowing for multiple reporting and low rates of false alarms

Roboguard Technology

Secures the perimeter and replaces the need for a human guard or a patrol vehicle. With laser scanner accuracy, Roboguard has swift response time to any perimeter alerts that may arise

Magal-S³ intrusion detection systems are durable, resilient and designed to perform under any weather condition including fog, corrosive materials, rain, wind, extreme temperatures, electromagnetic interference, and vibrations induced by ground traffic.

About MAGAL
